

Water Actions

Here are some examples of action you can take to save water at your school.

Investigate getting dual flush toilets

Investigate getting taps that turn off automatically

Educate others on what goes down sinks and drains - it may end up in a waterway

Look at how frequently gardens and lawns are watered

Look at different irrigation types on gardens

Participate in Waterwatch and monitor the quality of local waterways

Conduct a water audit at school or home to see how much water is being used and where water use can be reduced

Install rainwater tanks

Replace plants and gardens that need lots of water with native species
